

## Press Release

Zurich/Hamburg, 12 June 2017

# oneclick enters Strategic Partnership with Sogeti Infrastructure Services

oneclick AG, the operator of the Application Delivery and Streaming Platform of the same name, and Sogeti Germany GmbH, Infrastructure Services Division, have agreed a strategic partnership to develop digital workplace and virtualisation solutions in small and medium sized enterprises (SMEs).

The cooperation between the technology start-up and the market leading consulting specialist for IT infrastructures is a result of increasing acceptance of virtualised environments. On-premises servers are either replaced or at least complemented with infrastructure resources from the cloud. This offers a great opportunity, in particular for SMEs, to simplify their outdated or organically grown, complex IT infrastructure and to reduce operational costs. In addition, hybrid infrastructure concepts score due to better availability, scalability and flexibility.

"We think IT from the viewpoint of the customer", explains Sebastian Bürkle, head of Infrastructure Services at Sogeti Germany GmbH. "An optimised infrastructure is, of course, the foundation for everything that takes place. And this is what we look after. The noticeable benefit for the user is, however, the form of deployment. We see the future in a central, high availability desktop for all required applications, virtual desktops and SaaS solutions. While analysing smart application delivery and streaming solutions, we came across oneclick™. The platform allows simple, quick and secure provision of applications and data from any infrastructure source in a central workspace in the browser. With any device users can access their workspace, applications and data that they are authorised to use."

"The partnership with Sogeti addresses in particular SMEs, who face the challenge of digitalisation and the transfer of infrastructure capacities into the cloud", says Dominik Birgelen, CEO of oneclick AG. "We are delighted to be able to offer infrastructure complete solutions together with Sogeti, which will significantly improve the situation of customers. Sogeti is clearly committed to Germany as a location, but our joint customers also benefit from successful project experience by an internationally operating consulting expert."

In order to implement complete solutions, Sogeti Infrastructure Services introduces the existing collaboration with OVH Germany to the partnership to deliver hybrid and private

cloud concepts a via the oneclick™ platform to SME and enterprise customers. OVH is one of the world's leading providers of IT infrastructures.
