

## Press Release

Zurich, 07 July 2017

# The International Chamber of E-Tools awards oneclick with the Gold Certificate

The International Chamber of E-Tools has awarded the Gold Certificate to the Application Delivery and Streaming Platform of oneclick AG. Over 5,000 organisations rely on the certification results of the Swiss based association. The International Chamber of E-Tools aims to facilitate the safety and quality of digitalisation tools, which are implemented to advance in business, science and administration. The oneclick™ platform was evaluated by experts using a test account and involved interviews with various customers, willing to serve as a reference.

oneclick™ enables the provision of software applications and data as an encrypted stream from any server location in a central workspace in the browser. This in turn allows simple, quick and secure remote access. The oneclick™ platform is suitable for systems integrators, managed service providers, software vendors and data centres as well as end customers to simplify and automate processes for software deployment.

The reason for the highest award by the association was that oneclick™ makes day-to-day work of IT departments significantly easier. For example, no software needs to be installed on devices as applications can be deployed from any infrastructure source via a central platform to the browser. In the course of the test procedure, the simple set-up of the platform and professional project management during implementation were particularly highlighted. Its suitability for international organisations and any sector, the fair price model on a monthly basis, as well as an excellent price/performance ratio all contributed positively to the evaluation.

More information about the Application Delivery and Streaming Platform of oneclick AG are available at <https://oneclick-cloud.com>. There you can also register for a test account.
