

## Press Release

Zurich, 20 August 2019

# oneclick again in “Gartner’s Hype Cycle for Unified Workspaces” report 2019

oneclick has been featured in the Gartner Hype Cycle for Unified Workspaces report 2019 for the second time in a row after 2018 as a sample vendor for Unified Workspaces and Workspace Aggregator.

Gartner’s Hype cycle shows which phases of public attention a new technology goes through during its introduction. Its 2019 report focuses on how changes in people, processes and technologies redefine the end-user computing (EUC) experience.

Unified workspaces provide secure access to all applications and data. They are the answer to a changing working world and working styles as well as increasing digitalisation requirements. Today, work takes place more and more independently of location and in an agile interaction with other team members.
