For MSP's

Simplify the provisioning of infrastructure, applications and services

oneclick™ is an **instantly available cloud platform** that includes **all components for application provisioning** and supports you to **administer more customers in less time**. Thanks to the **streaming technology** you can deliver any application, from any infrastructure, on the right device, for the right person, at the right time and location. All you need is a thin client and an internet connection.

Also, **infrastructure projects in the cloud** can be **implemented easily**. We help you and your customers in the selection, calculation and implementation of the appropriate public cloud.

"The oneclick™ platform allows our customers to seamlessly access legacy applications from their own data center from Chrome devices and through Google G Suite using Single-Sign On."

"oneclick™ ensures uniform customer administration and secure delivery of individually equipped desktops without us having to worry about individual endpoints. The cumbersome VPN management is a thing of the past."

"With oneclick™, our customers can easily, quickly and securely move their client desktop infrastructure to the cloud. Each employee receives a fully-fledged cloud computer which is automatically deployed in Microsoft Azure."

The oneclick™ platform includes the following features:

Fully **personalised, secure web portal** for access to all assigned apps across all operating systems = **Native Windows, Linux, MacOS & Web.**

Extremely fast, self-developed streaming protocol for **smooth remote work** as well as optimised mouse and keyboard inputs for mobile devices.

Mounted drive that can be paired with any application, including drag-and-drop file upload and offline functionality.

Automated **connection of existing server locations** to bring legacy applications instantly up to the state of the art.

Via interfaces, **create and manage new virtual machines in the data centers of well-known cloud providers.**

And **much more:**

- ✓ Direct delivery of a single app
- ✓ Integration in O365 or Google G Suite
- ✓ Enhance RDS and VPN
- ✓ Connect USB Devices and Printers
- ✓ Extensive security mechanisms
- ✓ EU-GDPR compliant
- ✓ No investments, pay-per-use

With oneclick™ as your delivery model for applications and data, you can **reduce provisioning costs** for yourself and your customers **by up to 50%.**

Test our **free trial:**
