

Home office and instantly available remote access

Any application, from any infrastructure, on the right device, for the right person, at the right time and location.

The current situation with COVID-19 poses unprecedented challenges for our society, the economy, public institutions, authorities and schools. For many of them it is now a matter of continuing to participate in economic life despite massive restrictions. Enabling work from the home office is becoming a short-term necessity for all kind of organizations.

oneclick™ can solve this challenge quickly and effectively. The oneclick™ platform enables work from the home office via streaming for any size of organization and any application environment:

Windows

Mac

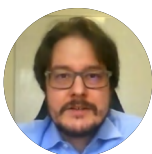

Linux

Web apps

Within hours, a **remote access infrastructure** can be up and running **from the Cloud, available worldwide**, with **maximum security, without installation** on servers or end devices, **without VPN**, without setup costs, with flexible billing per user and month.

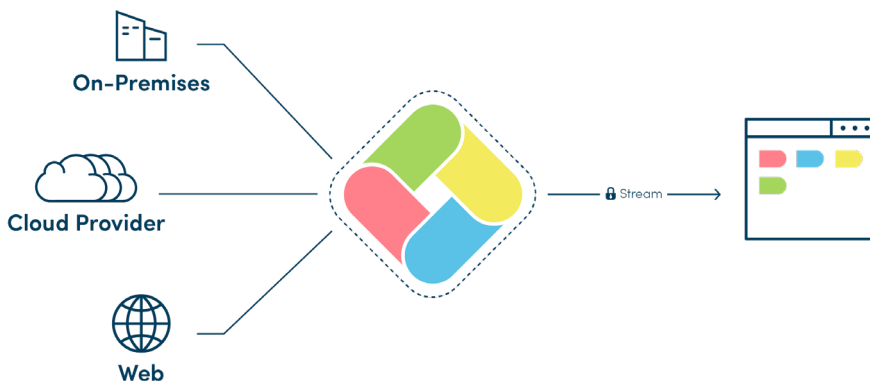

“In the course of one day, we were able to get 100% of the employees home office capable – thanks to the support of oneclick.”

Lars Majewski – Managing Director comtide IT
(Specialized in IT for container ships and digitalization of SMEs)

- 📍 100% web-based access to centrally hosted applications and office PCs via “plug & play”, without VPN from the end devices
- 📍 Easily create new virtual machines in Microsoft Azure data centers
- 📍 Bring any legacy and even CAD application into the Cloud, including single sign-on
- 📍 High-performance remote access that feels as if users are working locally

A powerful tool for provisioning home office workplaces

1

Connect existing infrastructure or provide new Cloud resources in the data centers of well-known IaaS providers directly via oneclick™.

2

Flexibly on- and offboard infrastructure, applications, external storage and users.

3

Stream all web apps, native applications, desktops and data into a personalised workspace in the browser and do without endpoint management.

Multi-layered systems reliably protect your applications and data against cyber attacks:

oneclick-cloud.com/en/cloud-dmz-zero-trust-security/

Fully **personalised, secure web portal** for access to all assigned apps across all operating systems.

Extremely fast, self-developed streaming protocol for **smooth remote work** as well as optimised mouse and keyboard inputs for mobile devices.

Mounted drive that can be paired with any application, including drag-and-drop file upload and offline functionality.

Do you have any questions?
